Arrowwood District School Fair on Sept. 25 and 26

With the summer holidays drawing to a close, and school commencement looming in the near future, the annual School Fair, which a few short months ago seemed so far away, now attracts attention as the first of the Fall events in the district, occurring as it does this year on Friday and Saturday, Sept. 25th and 26th.

Last year one of the most successful School Fairs ever organized in this district was held. Because of the enthusiasm displayed and the difficulty experienced in carrying out all the various activities in a single day, the Committee has this year decided to extend the Fair over two days.

An attractive prize list has been prepared, including over \$250.00 in cash donations, and over a hundred special prizes. In addition to these prizes special scholarship courses at the Agricultural School at Olds are offered to the boy and girl obtaining the highest number of points in the agricultural classes. Copies of the prize list have been distributed, but there are still few on hand, everybody who did not obtain one should see the Secretary, Mr. E. G. Bird.

The following are the committees in charge of arrangements for the two days. From past experience however the work will be heavy and volunteers will be warmly welcomed.

EXECUTIVE

President—D. Richards
Vice-President—A. H. Tharlie
Sec'y-Treas.—E. G. Bird
Finance.—Mrs. F. A. Hall
Mrs. E. Lowendon; E. G. Bird, E. Harp.

Arrangement—All teachers of competing school districts
Sports—H. McCullough, R. Beacom, E. G. Bird
Prize List—Mrs. R. McBride, Mrs. R. Williams, Mr. R. McBride.

Programme—Mrs. M. Ward, Mrs. E. Lowendon, Mrs. H. Ellis, Mrs. R. Hales
Livestock—V. E. Vancil, J. Williams, R. S. Shatto, D. Richards
Grain and Vegetables—A. H. Tharlie, E. Harp.

DAILY WALK URGED TO INSURE HEALTH

Walking in the open air is one of the best exercises for health. Every one should take a brisk daily walk out of doors; unless his doctor forbids to do so.

Walking is the most natural exercise. Man was made to walk, to use his legs, not to be carried about in an automobile. Walking is also cheap.

These are only common-sense reasons for walking, but medical science gives us many others that deserve to be considered with care.

Walking deepens the breathing and expands the lungs more fully.

Inhaling fresh air keeps our apparatus free from germs, tones their living membranes, and prevents the onset of such diseases as colds, influenza, and consumption.

Beauty and Banff, the heart of the famous Canadian Rockies are synonymous and as like attracts like it is not surprising to find such a bevy of beauty as is shown in the accompanying picture, depicting itself in the beautiful swimming pools of the Canadian Pacific Railway's palatial Banff Springs Hotel. There are two baths, one of naturally heated sulphur water and the other of ordinary stream water, both of which are extremely popular with the many visitors to the renowned summer resort. Recreations in infinite variety run the gamut of sports from golf to mountaineering. Real cowboys are on hand to take trail-rides through the innumerable passes of the historic mountains, while Stoney Indians and scarlet-clad Mounties add yet another touch to the already colorful scene. Banff is something that has to be seen to be appreciated. Its devotees come yearly from the four corners of the globe. There is always something new; always something to do, and when the long happy day is over, dancing to the smart orchestras in the spacious ball room of the hotel

forms a fitting prelude to a restful night in the health-giving mountain atmosphere. Yes, Banff is beauty and beauty is Banff and the smiles on the faces of its numerous speak volumes for the happiness of this great playground.

Sunday at the Church of the Brethren

Rev. Ralph G. Rarick, Summer Pastor

When, at 10:30 a. m., the clapper strikes the gong, an enthusiastic group of over a hundred will be off again in another good session of Sunday School. International Lesson—"The Mission to Cyprus" or "Christianity at Court," Acts 12:25-13:12. All those who are not as yet connected to a School somewhere are urged to join in. You will like it. There is accommodation for all ages, from Gray-haired Grandpa down to Wee-Baby Bessie.

Worship and Preaching Services in forenoon at 11:30 and in the evening at 8:00. In these services you will have good opportunity to receive and give and abundantly live. "Down on the Farm" will be the message Mr. Rarick will release in the first service, and in the evening will be—"The Bigness of Little Things."

All members of the church are expected to be present at 8:00 o'clock, Tuesday evening, Sept. 1 for the September Council.

As a group of the great number in this world who have joined the force of Righteousness, the Brethren openly declare themselves for anything and everything that is unmistakably for the general welfare. This explains why the Brethren are boosters for the "Bow Valley Resource."

When washing out glass, add a little ammonia to the water and it will make the glass very bright and sparkling.

Mother: "Why are you reading that book on the education of children?"

Son: "To see if you are bringing me up properly."

Three Accidents During the Week

Last Sunday while the little son of Mr. and Mrs. Malcolm of Milo was playing, he fell and fractured his wrist.

While driving a bundle rack Thursday, last Mr. Nelson of Queenstown had the misfortune to fracture his leg. His team running away caused the accident.

On Monday Charles, Tarbin was injured in an automobile pushed a horse through the side of his sister, Mrs. Olson, who drew the car to the side to let Mr. Paige drive into his farm. But Mr. Paige had stopped to let Mrs. Olson pass, resulting in a collision in which the boy Charles fractured his arm.

Dr. E. J. Liesemer attended all three cases. Patients are each doing well.

Ragpicker Uses Motor

The motor-car is being brought into the service even by the humblest forms of business. Even the ragpicker is now abandoning his hand-croft or horedrawn vehicle for the more modern form of transportation. One who not very long ago pushed a barrow through the streets in the early morning hours, shouting the French equivalent for "Any rags or bones," recently became sufficiently prosperous to buy a skinny horse. But his progressive ambition being still unsatisfied, he has now begun to use a motor car on his morning rounds. It is an ancient vehicle, almost ready for the scrap-heap; but it fits well with its load, and quickly enough for the rag business. He can afford to scorn mere pedestrians and beggars. A motoring knife-grinder has also made his ap-

Alpine Class Enjoys Social Last Friday

The Alpine Class of young people in the Brethren Sunday School participated in a delightful social gathering Friday night in the dining room of the Church. There were wholesome contests and a serving at the close of heartily-consumed refreshments. Mr. Rarick, pastor met with them. Their teacher is John A. Fisher.

Will be Missed

Mr. and Mrs. M. W. MacDonald, son Malcolm and daughter Major, left last week to investigate points in the Peace River and B. C. They will enjoy camping on the tour. Some of the places they intend visiting are McLennan, Alta. Dawson Creek, and Peace Coulee; the last two towns being in the Peace River Section of B. C. They will be greatly missed in social circles in Arrowwood. But all will be glad to hear of success attending them wherever they decide to locate.

She Did

The patient assistant in the boot shop had tried hard to suit his stout woman customer. Neatly everything in the shop had been brought down for her inspection, but to no purpose. Still another pair of shoes was produced. "No," she said "I don't like these. They tend to get wider as they get older." "Well, madam," said the exasperated salesman "didn't you?" "Yes," she said "I don't like them. He goes his rounds in a small car, and the engine drives his grinding wheel. Youth's World."

School Opens for the Fall Term on Tues., Sept. 1st

The bell at the Arrowwood school will be heard again at 9 A.M. on Tuesday Sept. 1, when school opens for the fall term.

With the exception of the principal, the teaching staff will be the same as last term. The teaching staff will consist of: Mr. Johnston, Principal formerly of Langdon; Mr. McCullough, Vice-Principal; Miss Spencer; Miss MacLeod; and Miss Mackie.

Frances McBride Wins Scholarship

We offer our congratulations to Miss Frances McBride who has returned home after spending a week at the Claresholm Agricultural School, a scholarship she gained at last year's School Fair. While at Claresholm Miss McBride further proved her ability by winning the scholarship for a whole year's course at the Agricultural School offered at the summer short course for the best student.

To Irricana And Calgary

Rev. and Mrs. John A. Culp motored Saturday afternoon to Irricana. There, in the late afternoon, at the beautiful country home of Mr. and Mrs. Houston H. Wray. Mr. Culp officiated in the lawn wedding of their daughter Marion to Mr. Aubrey J. Lepper.

Rev. Ralph G. Rarick, who accompanied the Culp's, and who was also at the wedding, preached in the country church there in the forenoon and in the town church in the evening. Sunday, Mr. and Mrs. Culp returned home after the service Sunday night. Mr. Rarick remained in the Irricana community, to renew acquaintance with some friends, until the afternoon of Monday, when he accompanied Charles C. Gump to Calgary. He was there principally the guest of Mr. and Mrs. Isaac Brubaker, who recently visited several days there in Arrowwood. Mr. Rarick returned here late Tuesday night, in company with Mr. and Mrs. Lawrence Larsen, who were on business Tuesday in Calgary.

Births

BORN—To Mr. and Mrs. L. Dianne at the Arrowwood Hospital, on Aug. 10, a son.

BORN—To Mr. and Mrs. H. Jorgensen, Queenstown, Wednesday, Aug. 12, a son.

BORN—To Mr. and Mrs. Wm. Service on Tuesday, Aug. 25th, a son.

BORN—To Mr. and Mrs. Glen Field, on Aug. 26, a son.

A Corporal was marching in front of his squad when he overheard a voice in the rear rank say: "This squad is like a flanker. The flank is in front."

The Little Red School House

As one looks back even to the opening years of this century he cannot help but be impressed with the change in school work. From the little log school, with benches along the wall to the modern consolidated school is a long stride. And the corresponding changes in equipment, curricula and the academic and professional training of the staff shows a parallel growth. So it is very doubtful if any branch of society—mechanic included—has shown greater progress. Then all honor to those leaders who have brought it up to this high standard, but there is yet much to do as the Perrin Baker Bill suggests.

And the school has been blamed and praise for much. Socialists and communists, though differing widely, unite in blaming the schools and universities for a capitalistic bias in their teaching which has retarded the coming of the materialistic millennium. Among the "wets" the schools are often blamed for the Volstead Act. But patriots are unanimous in their praise of the school as a means of creating a law-abiding, country-loving people. And unquestionably religion thrives best where knowledge is greatest. That the school is a power, both those who blame and those who praise acknowledge. Those twenty-five hours a week which our little people spend under the guidance of conscientious, trained teachers is one of the greatest heritages of the present generation. Hurrah for the School Board and the Staff.

UNUS SOLUS.

Paper From The Old Home Town

Talk about your literature
And papers up-to-date,
About the legislature
And doin's through the state
To me they ain't compan'
Though I look the world
around
To the little newsy paper
From the old home town.

There's somethin', Brewin' in
the air
The day the paper comes;
Ma she goes about her work
And either sings or hums—
But I just get so restless—
Till the postman brings it
down
And I'm first to grab the paper
From the old home town.

Ma comes into the sittin' room
And lets the dishes go
And listens while I read about
The folks we used to know,
For births and death and land-
deals
And weddin's too, abound—
All are mighty interestin',

Thumb Sketches

IF the fox had kept on, straight ahead,
Instead of stopping as has been said,
He'd have caught the mouse—no doubt he would—
At least the story says so could.

IF Old Bill Sykes had used a golf-
In fact the story makes me laugh—
He'd have caught that 30-pounder pike,
He lost it. "For the love o' Mike."
Says Bill, "It was a monster-look!"
As long as that, and on the hook."

IF Jones had drawn 4-2-6-1—
(Which, of course, he says he could have done)
He'd have been a bloomin' millionaire—
Poor Jones, he missed it by a hair.

IF I knew you and you knew me,
We wouldn't fight so often, see?

IF the Canadian knew the Dutchman well,
A different yarn there'd be to tell.

When Nations meet this truth applies—
The lust to kill each other dies.
Next year we'll meet them here at home
To talk of rice, and oats and brome,
Of barley, beans, and corn, and wheat—
A great world get-together meet,

IF Farmer Stubbs would show his best
He'd stand a chance, with all the rest,
To win some cash in '32,
He'll wish he had, and so will you,

If I had entered—"Stubbs will say,
"Confound the IF's. The IF's don't pay."
He'll envy others, who win renown—
AFTER the Show at Regina town.

IF Jimmie Brown and Susie Lee
Had known their love for each to be
So great, so pure, so good and true,
Then Jimmie would have married Sue,
And Susie would have taken Jim;
"I'll tell the world," she says of him.
But Jim took May, and Susie, Bill;
And all four lives have yielded nil
But scraps and tears and mortal sin—
Great Scot! The things that might have been!

From the old home town:
I know it ain't so classical
As these big dailies are.
That tell all about the prize fights
And latest movie stars,
But just for my enjoyment
There's nothin' I have found
Like the little newsy paper
From the old home town.

Rockets

Ever since Jules Verne wrote about a mysterious trip to the moon in a rocket-like vehicle, men's imaginations have been fired by the possibilities of this form of travel.

To-day, people are trying to propel boats, automobiles and even airplanes by means of the so-called rocket principle. The rocket principle of propulsion involves the discharge of an explosive in one direction, and this causes the vehicle from which the explosive is discharged, to move in the opposite direction. This source of power is very hard to control and has proven to be of little use on vehicles of the types mentioned. However, not a few scientists are hopeful that the rocket will enable them to find out something about the outer atmosphere of the earth. They hope to shoot up rockets containing scientific instruments which will record conditions at great heights. Some form of parachute will be necessary to prevent the discharged rocket, with its valuable cargo, hitting the earth too hard on the return journey. It would seem that the day when men will travel to other planets in large rockets is still very far away.

Clean leather picture frames, portfolios, and other leather articles with benzine. Apply with a soft cloth, and if the benzine removes the polish, apply the white of an egg, well beaten.

Until Business is Good

Let's sit down and whine
Until business is good.
Let's grumble and pine
Until business is good.
Let's kick and complain,
And show our disdain,
From all boosting refrain
Until business is good.
Let's quit eating meat
Until business is good.
Let's turn off the heat
Until business is good.
Let's buy no more clothes,
Or attend any shows,
And shut off the hose
Until business is good.
Let's pay no more taxes
Until business is good.
Let's lay down our axes
Until business is good.
Let's build no more schools,
Or obey traffic laws
And pawn our jewels
Until business is good.
Let's holler for booze
Until business is good.
Let's blame all our cares
On the bulls and the bears,
And rest in our chairs
Until business is good.
Let's hide all our cash
Until business is good.
Let's stop paying bills
And stop taking pills.
And shiver with chills
Until business is good.
Let's quit paying rent
Until business is good.
Let's live in a tent
Until business is good.

Let's go without socks
And quit winding clocks
And invest in no stocks
Until business is good.
Let's stop driving cars
Until business is good.
And quit smoking cigars
Until business is good.
Let's stop eating pie
And lay down and die
So the undertaker will cry:
"My business is good."

Frank W. Savage

MILK RECORDS HELP

The value of milk records in improving herd production is the subject of an interesting reference in the annual report of the work of Illustration Stations for 1930, which has just been issued. In 1928 the average production from eighteen test herds was 6,442 pounds of milk for 1930 the individual average was 7,073, an increase of 631

pounds of milk per cow over a period of two years. Only by actual knowledge of what each cow in his dairy herd is producing can the farmer today eliminate the "boarders and increase total production and the earning power of this phase of his farming operations.—Dept. of Agriculture, Ottawa.

Wheat Pooling

Alberta Wheat Pool members may pool any proportion of their wheat or may sell any proportion at current prices. The choice is left with the individual.

Alberta Wheat Pool Elevators are operated under a public license and will handle any grain on an open market basis.

If a non-pool member grower desires to pool all or any proportion of his wheat, he will be required to sign a pool contract. This contract does not compel him to deliver all or any part of his wheat on pool basis. Its purpose is to lay down regulations under which the wheat is to be pooled.

**See that Your Wheat is Delivered to a
Pool Elevator**

PREMIER BROWNLEE'S STATEMENT

"A complete cut-off has been made from previous years' operations and a settlement arranged as between the Pools, the Provincial Governments and the banks. Members of the Pool and farmers generally desiring to do so may, therefore, patronize the Pool elevator facilities with complete assurance that their grain will be dealt with as a separate crop and without in any way being liable for any debts or obligations of past years."

PRINTING

To Suit Your Needs

We are in a position to execute orders of all kinds of Commercial and Social Printing. Orders large or small given the same careful attention, and delivered with dispatch. Place your printing in Arrowwood and keep your money in your own town and district.

REGISTRATION OF THRESHING MACHINES

(Sec. 2, Chap. 193, R. S. A. 1922)

Every person, firm or company owning or operating a threshing machine or separator (including combines), shall each year before commencing operation register machine or machines with the Minister of Agriculture and shall procure a certificate of registration.

Registration fee—\$10.00 per machine.

Apply:

H. A. CRAIG;
Deputy Minister, Dept. of
Agriculture,
Edmonton, Alberta.

WHO'S WHO

(By Geo)

Colonel J. H. Innes

As Deputy Minister of Natural Resources for Nova Scotia, Colonel Innes is giving to the World's Grain Exhibition and Conference whole-hearted support.

He was born at Goldbrook, N.S., and educated at McGill University, securing from that institution a B.S.A. degree. For some years he was manager of a fertilizer organization of Toronto, and in 1918 a director of the Soldier Land Settlement scheme of Canada.

For eight years Colonel Innes was director of agriculture, Dominion Land Settlement Branch. He was appointed to his present position, Deputy Minister of Natural Resources for Nova Scotia, about four years ago.

Colonel Innes is secretary of the Maritime Development Association, and owns and operates a large fruit farm in the Annapolis Valley. He is vice-chairman of the Nova Scotia provincial committee of the World's Grain Exhibition and Conference.

The Cow a Food Laboratory

(National Crop Improvement Service.)

How can we build a new breed of men without we start with the babies? It is impossible to improve our race unless we nourish our infants that they may develop both physically and mentally.

The dairy cow is at the foundation of every industry. She is a most wonderful laboratory. She fills her stomach hopper with grain, grass and silage, then she lies down and by chewing her cud, converts this raw material into the most perfect food in the world.

Doctor McCallum, of Johns Hopkins University, tells us that the "water soluble A" and the "fat soluble B," two mysterious somethings, are found in milk as nowhere else. Without these mysterious vitamins children will not grow, so milk-fed babies have the greatest possible advantage over the wolf-reared children raised without milk to drink.

How are the slum babies fed? Black coffee, pickles, imitation jams and molasses on their "bread" constitute the daily ration of thousands of our poor families in the cities.

Without milk children languish, the vigor of the race declines and the vitality of the human race runs low.

POULTRY CULLING

(Experimental Poultry Notes)

For a flock to be profitable, full and systematically culled every year. The Experimental Farm, Indian Head, Sask., recommends the following in regard to culling.

Culling should be done in July or August when producers have generally ceased to lay. A liberal room will also be required at this time of the year for the pullets.

If trap-nests have been used and records of all birds kept, culling from the production angle, will be a simple matter. Where no individual records are available it will be necessary to observe the physical characteristics which indicate production or non-production in the flock.

The purpose of culling, in general, is to improve the type and average production of the flock. It is therefore necessary to know the breed characteristics as well as the characteristics of production before starting to eliminate any individuals from the flock. One should have, at all times, a picture of the ideal in

his mind's eye but should be careful that production is not sacrificed for unnecessary "style" or "fanciness" of type or plumage.

Features relative to breeding type which should be considered as important in the farm flock are—size and weight for breed general plumage colour type of comb, colour of legs and type of legs for breed (bare or feathered, etc.)

From the production standpoint a good layer may be recognized by the following characters: A fine, clean-cut head, showing a bright prominent, alert eye; comb and wattles having a turgid, waxy appearance, usually bright red in colour. Capacity for egg production is shown by a wedge-shaped body, having good length depth, and width, with the width carried well back over the hips without tapering toward the tail. Such a body provides room for large amounts of feed and for egg development. The bones in the rear part of abdomen should be well apart and flexible to the touch.

Birds which should be culled are—old hens, hens which are early in molting, badly off-type individuals, those with narrow, crow-like heads, meaty heads, sunken eyes, shrivelled comb, wrinkled skin, narrow and shallow bodies, or tall and upstanding individuals.

If An Egg Could Talk

If an egg could talk it might say:

I am a egg.
I am the embodiment of life and health.

I am nature's original package of vim, vigor and vitality.

I am a perfect little mine of marvellous minerals.

I am the nearest approach to a balanced ration in the original container.

I am boiled, broiled; baked; fried, fried; poached, pickled, scrambled, shirred and omelette.

I am the inevitable partner of fried ham, and inseparable companion of his brother, bacon.

I am the blessing of breakfast; the leaven of luncheon; and the distinction of dinner.

I am the circulating currency of the country; the floating finance of the farmer; the answer to the ailments of the agriculturist.

Mosquito Remedy

A remedy for mosquitos is made by mixing equal parts of oil of sassafras and alcohol, and touching to the hand, face and legs. Or rub the face and hands with a little citronella oil.

Warts

A remedy for removing warts is to dissolve a quantity of washing soda in a pan of water. Wash the hand in this solution and then allow them to dry without wiping.

News at Large

In the strongest vaults in the world, situated in the Royal Mint, London, bullion worth \$350,000,000 is sometimes stored.

Ottawa, Aug. 21.—Despite vigorous competition and several adverse work factors, Canada contributed practically one-third of the world's wheat shipments during the 12 months ending July 31 last.

Winnipeg, Aug. 21.—Between \$4,000,000 and \$4,000,000 will be distributed directly to growers of wheat in the three prairie provinces as a result of the federal government's bonus of five cents a bushel, according to an estimate made by E. B. Ramsay, chairman of the Board of Grain Commissioners, who Thursday announced details of the bonus administration.

"Your husband seems to be a man of rare gifts."
"He is. He hasn't given me one since we were married."

"Gilly, you were entertaining a man in the kitchen last night, were you not?"
"That's for him to say, ma'am. I did my best."

In a courtroom the other day Judge White was reproving a colored man for deserting his wife, and dwelt at great length on the injustice he was doing.
"Wife deserting is something. Rascals that I must deal with severely, I'm afraid, and I feel strongly on this subject."

"But, Judge, you don't know that woman. Ah ain't no deserter, Ah'm a refugee."

Agriculture

Food Water Best

Studies in keeping cream sweet made by the Dairy and Cold Storage Branch of the Dominion Department of Agriculture show conclusively that food water not only keeps cream better than when it is placed in a refrigerator but that it takes considerably less ice. The reason for this lies in the fact that the food water, being a better conductor than the cold air of the refrigerator, cools the cream more quickly.

Fooling Jack Frost

The farmer doesn't very often get a chance to fool Jack Frost, especially on a soft crop like tomatoes, but experimental work at Morden, Man., by the Dominion Department of Agriculture shows conclusively that this can be done. With the advance of the season tomatoes ripen more slowly and the use of ethylene gas speeds up the process from late August on. Fruit in danger of frost can be picked and quickly ripened by the use of this gas.

Milk a Bone Builder

Scientific research finds another good reason for the liberal use of milk, especially in the diet of the growing child, and that is its capacity as a bone builder. The human body contains more calcium than it does any other mineral, and the best and cheapest source of supply is milk. Dietetic experts assert that a quart of milk daily ensures the growing child of the best storage of calcium for the manufacture of bones and teeth. It is equivalent in calcium content to 10 large oranges, 10 large halibuts of carrots, 32 eggs, or 20 pounds of beef.—Department of Agriculture, Ottawa.

Butter Exports Resumes

The current market report of the Dominion Dairy and Cold Storage Branch gives information of significant interest to farmers and dairymen in the volume of exports of butter overseas. Last year during the export period, May 1 to June 7, Canada exported a total of 937 packages of butter; this year (1931) for the same period exports totaled 26,012 packages. Exports for the week ending June 6 totalled 14,672 packages, all but 381 of which went to the British markets at London, Liverpool, Bristol, Cardiff, and Manchester. Evidently butter production in Canada has settled down to an export market basis which may in the long run prove a real benefit to Canadian farmers.

Round About Town

School opens on Tuesday, September 1st.

Mr. and Mrs. Lawrence Larsen were Calgary visitors Tuesday.

Mrs. J. M. Wens and children spent Thursday in Calgary.

Mr. and Mrs. H. Peever of Brooks were visitors at Arrowwood on Sunday.

Mr. and Mrs. Saunders are expected home in a few days from their visit to the Coast.

Miss Margaret Hurley, of Queenstown, is visiting with Miss Doris Miller.

Mr. McCaffery, barrister at Calgary, was a business visitor in Arrowwood last Saturday.

Mrs. J. Mackie and daughter, Miss Isabelle, spent the weekend in Calgary.

Mr. and Mrs. C. G. Taylor were visitors in Calgary, Thursday.

For the benefit of farmers desiring to shop after supper the stores are remaining open till 9 a.m.

Mr. and Mrs. R. T. Amery of Crossfield, Alta., were guests at the home of Dr. and Mrs. E. J. Liesemer over Sunday.

Master Raymond Lowendon left on Monday to spend the remainder of his holidays with his sister, Mrs. Ward, on the farm.

Little Jeanabelle Tharlie of Sunset Valley is spending a few days with her friends, Grace and Freda Bond.

Miss Both Ellis returned last week from Calgary, where she had been visiting at the home of Dr. and Mrs. Alexander.

Miss Irene Hesketh, returned Sunday from Gleichen, where she has been visiting with relatives.

WAGIN' TUNG

Vol. 1, No. 2 Arrowwood, Aug. 27, 1931 Items for That

The Arrowwood Newspaper is a Reality

On Thursday, August 30th one of Arrowwood's fondest hopes became a reality when the claxon cry of news boys was heard on our streets shouting "The Bow Valley Resource." Mr. Cory deserves a great deal of credit for his first effort, and the way the business men rallied to his support shows that they are willing to support this much needed enterprise. Now as we all put our shoulders to the wheel and we are away to a bigger and better Arrowwood. Congratulations to Norman Cory.

Hallo folks! Here we are again, and don't forget that we expect to be with you each week thru these columns.

You will find us headquarters for that popular "Holland Brand" binder twine in either the 550 or 600 foot length.

High Grade Motor Oil is a cheap machine oil at any Price. We have this high grade motor oil at a cheaper than market price. Bring your cans and get them filled at 65c per gallon.

A Scotchman was seen to rush out into a heavy congested street to pick up a sumpstone where he was run down and killed! The coroner's jury held an inquest and earned in the following report: "Death resulted from natural cause."

If it's tires that you are going to need this fall we will be glad to serve you
